**AMG Reports Financial and Operating Results
for the Third Quarter and Nine Months Ended September 30, 2016**

Company Reports EPS of \$2.00; Economic EPS of \$3.02

WEST PALM BEACH, FL, October 31, 2016 — Affiliated Managers Group, Inc. (NYSE: AMG) today reported its financial and operating results for the third quarter and nine months ended September 30, 2016.

For the third quarter of 2016, diluted earnings per share were \$2.00, compared to \$1.96 for the same period of 2015, and Economic earnings per share (“Economic EPS”) were \$3.02, compared to \$2.92 for the same period of 2015. For the third quarter of 2016, Net income was \$109.2 million, compared to \$107.7 million for the same period of 2015. For the third quarter of 2016, Economic net income was \$164.5 million, compared to \$159.8 million for the same period of 2015. For the third quarter of 2016, Adjusted EBITDA was \$219.8 million, compared to \$218.9 million for the same period of 2015. (Economic EPS, Economic net income, and Adjusted EBITDA are defined in the attached tables, along with reconciliations to the most directly comparable GAAP measure.)

For the nine months ended September 30, 2016, Net income was \$321.1 million, Economic net income was \$491.0 million, and Adjusted EBITDA was \$655.8 million. For the nine months ended September 30, 2015, Net income was \$362.0 million, Economic net income was \$491.4 million, and Adjusted EBITDA was \$679.1 million.

Net client cash flows for the third quarter of 2016 were \$5.8 billion. AMG’s aggregate assets under management were approximately \$730 billion at September 30, 2016, pro forma for a pending investment and investments which have since closed.

“AMG generated strong results for the third quarter, including Economic earnings per share of \$3.02 and record assets under management of approximately \$730 billion, which represents a 23% increase over the year-ago period,” stated Sean M. Healey, Chairman and Chief Executive Officer of AMG. “Our results reflect excellent execution across all aspects of our business, including ongoing organic growth, the long-term investment outperformance of our Affiliates, and the continued success of our strategy to partner with the highest-quality boutiques worldwide.”

“Despite muted industry demand for actively-managed strategies overall in the third quarter, AMG generated positive net client cash flows of \$5.8 billion across our diverse performance-oriented product set,” Mr. Healey continued. “Our net client cash flows, which were positive across all client channels and geographies, reflect clients’ increasing recognition of the competitive advantages of independent boutique firms in generating alpha – even in a low-return environment. AMG is one of the leading providers of value-added strategies globally, and with our Affiliates’ outstanding offerings across a broad range of highly attractive product areas, including global and emerging markets equities and one of the industry’s largest and most diverse alternative strategy sets, we are well-positioned for strong long-term organic growth.”

“We continue to have a unique opportunity to partner with the best alpha-generating firms around the world,” Mr. Healey concluded. “With our distinct investment approach and two-decade track record of successful partnerships, as well as our global scale, including proven capabilities to enhance our Affiliates’ asset-gathering efforts in key markets around the world, AMG is the partner of choice for the most highly-regarded firms globally. We are confident in our ability to generate meaningful earnings growth through accretive new investments in outstanding new Affiliates.”

About AMG

AMG is a global asset management company with equity investments in leading boutique investment management firms. AMG’s innovative partnership approach allows each Affiliate’s management team to own significant equity in their firm while maintaining operational autonomy. AMG’s strategy is to generate growth through the internal growth of existing Affiliates, as well as through investments in new Affiliates. In addition, AMG provides centralized assistance to its Affiliates in strategic matters, marketing, distribution, product development and operations. As of September 30, 2016, AMG’s aggregate assets under management were approximately \$730 billion, pro forma for a pending investment and investments which have since closed, in more than 500 investment products across a broad range of investment styles, asset classes and distribution channels. - (A) During the three months ended September 30, 2016, we determined that we had incorrectly recognized deferred tax benefits, a non-cash item, on certain Affiliate equity transactions dating back to 2005. The impact on all quarterly and annual periods in our previously-issued Consolidated Financial Statements was not material. The Company has revised its previously-issued Consolidated Financial Statements for periods prior to 2016. The effect of correcting the error for the six months ended June 30, 2016 (\$1.8 million) was recorded in the three months ended September 30, 2016.

The tables below show the effect of correcting the misstatement on our Consolidated Statements of Income, Performance Measures and Consolidated Balance Sheet. The revision had no impact on Income before income taxes or Total stockholders' equity.

- (B) Under our Economic net income (controlling interest) definition, we add to Net income (controlling interest) our share of pre-tax intangible amortization and impairments (including the portion attributable to equity method investments in Affiliates), deferred taxes related to intangible assets, and other economic items which include non-cash imputed interest (principally related to the accounting for convertible securities and contingent payment arrangements) and certain Affiliate equity expenses. We consider Economic net income (controlling interest) an important measure of our financial performance, as we believe it best represents operating performance before our share of non-cash expenses relating to the acquisition of interests in our affiliated investment management firms, and it is therefore employed as our principal performance benchmark. This non-GAAP performance measure is provided in addition to, but not as a substitute for, Net income (controlling interest) or any other GAAP measure of financial performance.

We add back intangible amortization and impairments attributable to acquired client relationships because these expenses do not correspond to the changes in the value of these assets, which do not diminish predictably over time. The portion of deferred taxes generally attributable to intangible assets (including goodwill) is added back because we believe it is unlikely these accruals will be used to settle material tax obligations. We add back non-cash imputed interest and reductions or increases in contingent payment arrangements because it better reflects our contractual interest obligations. We add back non-cash expenses relating to certain transfers of equity between Affiliate partners when these transfers have no dilutive effect to shareholders.

Notes (continued)
(in millions, except per share data)

- (C) Adjusted EBITDA (controlling interest) represents our performance before our share of interest expense, income taxes, depreciation, amortization, impairments and adjustments to our contingent payment obligations. We believe that many investors use this information when assessing the financial performance of companies in the investment management industry. This non-GAAP performance measure is provided in addition to, but not as a substitute for, Net income (controlling interest) or any other GAAP measure of financial performance. The title of this performance measure has been renamed from EBITDA (controlling interest) to Adjusted EBITDA (controlling interest). There has been no change in the calculation of this performance measure.
- (D) Economic earnings per share represents Economic net income (controlling interest) divided by the Average shares outstanding (adjusted diluted). In this calculation, the potential share issuance in connection with our convertible securities is measured using a “treasury stock” method. Under this method, only the net number of shares of common stock equal to the value of the convertible securities in excess of par, if any, are deemed to be outstanding. We believe the inclusion of net shares under a treasury stock method best reflects the benefit of the increase in available capital resources (which could be used to repurchase shares of common stock) that occurs when these securities are converted and we are relieved of our debt obligation. This method does not take into account any increase or decrease in our cost of capital in an assumed conversion. Economic earnings per share is provided in addition to, but not as a substitute for, Earnings per share (diluted) or any other GAAP measure of financial performance.
