Affiliate Returns: Strong Long-Term Investment Performance (AUM Ahead of Benchmark)

Liquid Alternatives: 16% of AUM

Illiquid Alternatives: 14% of AUM

Global Equity: 39% of AUM

U.S. Equity: 15% of AUM

Past performance is not indicative of future results. Performance and AUM information is as of 3/31/21 and is based on data available at the time of calculation. Product returns are sourced from Affiliates while benchmark returns are generally sourced via third-party subscriptions.

For liquid products, performance is reported as a percentage of assets that have outperformed benchmarks across the indicated periods, and excludes market-hedging products and Multi-Asset & Fixed Income. For purposes of investment performance comparisons, products are an aggregation of portfolios (separate accounts, investment funds, and other products) that each represent a particular investment objective, using the most representative portfolio for the performance comparison. Product performance is measured on a consistent basis relative to the most appropriate benchmarks. Benchmark appropriateness is generally reviewed annually to reflect any changes in how underlying portfolios / mandates are managed. Both product and benchmark performance are reflected as total return and are annualized for periods longer than one year. Reported product performance is gross-of-fees for institutional and high-net-worth separate accounts, and generally net-of-fees across retail funds and other commingled vehicles such as hedge funds and private equity funds.

For illiquid products, performance is reported as a percentage of assets that have outperformed benchmarks on a since-inception IRR basis. Benchmarks utilized include a combination of PMEs, peer medians, and absolute returns for where benchmarks are not available. For purposes of investment performance comparisons, the Latest Vintage comparison includes the most recent vehicles and strategies (traditional long-duration investment funds, customized vehicles, and other evergreen vehicles and product structures) where meaningful performance is available and calculable as of the current quarter-end. In order to illustrate the performance of our illiquid product category over a longer period of history, the Three Vintages comparison incorporates the Latest Vintage vehicles and the prior two vintages for traditional long-duration investment funds, as well as additional vehicles and strategies launched during the equivalent time period as the last three vintages of traditional long duration investment funds. Due to the nature of these investments and vehicles, reported performance is typically on a three to six month lag basis.

(1) The publicly available data shown above is used by AMG as a convention to approximate the impact of market changes on AMG's assets under management. The market indices represent applicable AUM benchmarks for each strategy, as selected by AMG, and will not be updated intra-quarter to reflect any updates or adjustments by the relevant index providers after 4/30/21. Generally, composites are assigned an equal weighting except for the Multi-Asset category which utilizes a 60% / 40% weighting to the S&P 500 / Barclays Capital Aggregate, respectively. These indices do not reflect AMG's investment performance, or the actual performance of any of AMG's Affiliates or their products, and are not indicative of past results or future performance.

(2) AMG's illiquid alternatives assets under management generally reflects committed capital, which is not impacted by market changes.

Notes

- 1) Earnings (loss) per share (diluted) adjusts for the dilutive effect of the potential issuance of incremental shares of our common stock. We had junior convertible securities outstanding during the periods presented and are required to apply the if-converted method to these securities in our calculation of Earnings (loss) per share (diluted). Under the if-converted method, shares that are issuable upon conversion are deemed outstanding, regardless of whether the securities are contractually convertible into our common stock at that time. For this calculation, the interest expense (net of tax) attributable to these dilutive securities is added back to Net income (loss) (controlling interest), reflecting the assumption that the securities have been converted. Issuable shares for these securities and related interest expense are excluded from the calculation if an assumed conversion would be anti-dilutive to diluted earnings per share.

The following table provides a reconciliation of the numerator and denominator used in the calculation of basic and diluted earnings per share:

<i>(in millions)</i>	Three Months Ended	
	3/31/2020	3/31/2021
Numerator		
Net Income (loss) (controlling interest)	\$ (15.6)	\$ 149.9

Average shares outstanding (basic)	47.8	42.6
Effect of dilutive instruments:		
Stock options and restricted stock units	-	0.6
Junior convertible securities	-	2.2
Average shares outstanding (diluted)	<u>47.8</u>	<u>45.4</u>

- 2) As supplemental information, we provide non-GAAP performance measures of Adjusted EBITDA (controlling interest), Economic net income (controlling interest) and Economic earnings per share. Management utilizes these non-GAAP performance measures to assess our performance before our share of certain non-cash expenses and to improve comparability between periods.

Adjusted EBITDA (controlling interest) represents our performance before our share of interest expense, income taxes, depreciation, amortization, impairments, certain Affiliate equity expenses, gains and losses on general partner and seed capital investments, and adjustments to our contingent payment arrangements. We believe that many investors use this non-GAAP measure when assessing the financial performance of companies in the investment management industry.

Under our Economic net income (controlling interest) definition, we add to Net income (loss) (controlling interest) our share of pre-tax intangible amortization and impairments (including the portion attributable to equity method investments in Affiliates), deferred taxes related to intangible assets, and other economic items which include non-cash imputed interest (principally related to the accounting for convertible securities and contingent payment arrangements), certain Affiliate equity expenses, and gains and losses on general partner and seed capital investments. Economic net income (controlling interest) is used by management and our Board of Directors as our principal performance benchmark, including as one of the measures for aligning executive compensation with stockholder value.

Economic earnings per share represents Economic net income (controlling interest) divided by the Average shares outstanding (adjusted diluted). In this calculation, the potential share issuance in connection with our junior convertible securities is measured using a “treasury stock” method. Under this method, only the net number of shares of common stock equal to the value of the junior convertible securities in excess of par, if any, are deemed to be outstanding. We believe the inclusion of net shares under a treasury stock method best reflects the benefit of the increase in available capital resources (which could be used to repurchase shares of common stock) that occurs when these securities are converted and we are relieved of our debt obligation.

Notes (Continued)

The following table provides a reconciliation of Average shares outstanding (adjusted diluted):

<i>(in millions)</i>	Three Months Ended	
	3/31/2020	3/31/2021
Average shares outstanding (diluted)	47.8	45.4
Stock options and restricted stock units	0.0	-

Average shares outstanding (adjusted diluted)	<u>47.8</u>	<u>43.2</u>

These non-GAAP performance measures are provided in addition to, but not as a substitute for, Net income (controlling interest), Earnings per share or other GAAP performance measures. For additional information on our non-GAAP measures, see our Annual and Quarterly Reports on Form 10-K and 10-Q, respectively, which are accessible on the SEC's website at www.sec.gov.

- 3) The following table presents equity method earnings and equity method intangible amortization and impairments, which in aggregate form Equity method income (loss) (net):

These statements include, but are not limited to, statements related to our expectations regarding the performance of our business, our financial results, our liquidity and capital resources and other non-historical statements. You can identify these forward-looking statements by the use of words such as “outlook,” “guidance,” “believes,” “expects,” “potential,” “preliminary,” “continues,” “may,” “will,” “should,” “seeks,” “approximately,” “predicts,” “projects,” “positioned,” “prospects,” “intends,” “plans,” “estimates,” “pending investments,” “anticipates” or the negative version of these words or other comparable words. Actual results and the timing of certain events could differ materially from those projected in or contemplated by the forward-looking statements due to a number of factors, including changes in the securities or financial markets or in general economic conditions, pandemics (including COVID-19) and related changes in the global economy, capital markets and the asset management industry, the availability of equity and debt financing, competition for acquisitions of interests in investment management firms, the ability to close pending investments, the investment performance and growth rates of our Affiliates and their ability to effectively market their investment strategies, the mix of Affiliate contributions to our earnings and other risks, uncertainties and assumptions, including those described under the section entitled “Risk Factors” in our most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Such factors may be updated from time to time in our periodic filings with the SEC. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this release and in our filings with the SEC. We undertake no obligation to publicly update or review any forward-looking statements, whether as a result of new information, future developments or otherwise, except as required by applicable law.
